Donna: Attached are the items that we committed to provide by today. As you recall, the item categories were as follows:

1. GI Plan – City will provide additional detail on GI projects, beyond information in this Plan (pavement plan, and list of parks included in GI program)
2. Rain gauges – City will provide an updated map that includes several new gauge locations that are being planned
3. Manheim Township – City will provide an estimate for costs involved in daylighting
4. North Basin pump station – City will provide peak and average flow numbers
5. Flow monitoring – City will provide information about plan for additional monitoring going forward
6. Infiltration testing – City will provide a subset of the site-specific test results, to reflect different project types and different levels of infiltration
7. GI sites – City will provide a map that includes all 160 sites
8. WWTP hydraulic issues – City will provide analysis and schematic
9. Force main C factor – this was addressed during recent call; field-measured data will be used in next round; explanatory information provided here
10. Model update list of tasks and schedule – City will provide a proposal

If you or any other EPA, DOJ or DEP folks have any questions, or would like any additional information on these issues, please let us know. Thanks.
